

Our Church and Clinic Activities on October 2009

The Medical Clinic Activities:

In 2007 our Church here are not growing up yet and we actually don't know how to improve there physical, spirit, even though we know God still has plan and makes a way for us such as healthcare center. This project "Medical Clinic" used to help them so much:

These pictures above are talking about foreigner volunteer nurse come to see and examine pregnancy women. If the foreigner volunteer like to joint us to serve them for the Kingdom of God we welcome!

These are showed examination with clinic decorations.

These activities they are waiting for going to see Doctor and receiving some medicines.

These are outside clinic cleaning pictures of the worker activities.

The Four women staff activities:

The picture on the right is kitchen and on the left is one part of clinic building that we used as class and settle for children.

These pictures above eventually show that all the fund (120\$) we get we distribute to all these activities, include one part we pay to the four staffs and one more part we spend to support their food for the children and some of them are orphans and some from the poor family, but all of these not enough for fund to help them. They still lack of food, education supplies and clothes. So we pray for help more enough funds.

As I am a Pastor of Freedom of Sen Sok Church and Clinic coordinator, I would like to thank as you are our donor that help this project from the first until now and hopefully that you still continues as our partner to God glory and makes God evangelize to be growing up in Cambodia country. May our God the Lord bless you!

Thanks;
Ps. Rathana Nop
